

## The Wholistic World Is In

A Natural Future is committed to teaching information that promotes and encourages actions and ideas that will help the willing individual, live more consciously, healthily and most importantly, happily. Our mission is to be at the forefront of promoting nature-based alternative lifestyles, that heal and strengthen our bodies, our minds and reunify our spiritual connectiveness. Ideas intended to allow us to grow in more fruitful directions, while at the same time not disconnecting us from the essential nutrients we get from our roots. We do so by sharing with you ideas, tools and services that you can & are invited to contribute to. Ideas with intentions that turn into ideals, like leaving no one behind, but ideas that remain fluid, never stagnant or ignorant of change; being thoughtful about our lives and lifestyles and the challenges produced by our industrialized world.

The path for A Natural Future has been cleared. The need for A Natural Future is now. Revolutionary movements like pure and natural organic foods, alternative/home schooling, extended breast feeding, mega-vitamin dosing, environmental protection, respectful use of resources, and vegetarianism that were once ridiculed have now grown-up into the swans that are now pursued and admired. The world has begun to turn a blind eye and a deaf ear to the mainstream's consumerism. Its failure to provide a true and sustained sense of happiness has left millions stranded and discontented; holding on to nothing more, than ills, bills and no will and taking refuge on old ideals, leaving them no alternative but the alternatives. A Natural Future was born not only to turn that tide completely around, but also to assist every single one of us in attaining the life we all originally intended &ndash; A Happy One. A Natural Future brings to town the most basic and powerful tools, essential to changing your life. A Natural Future will be teaching self-love, self-respect, self-governing, freedom of thought, freedom from financial enslavement, and just plain freedom. The logic behind these tools lies in the phrase "Travel Light, Travel Far". Accordingly, all of A Natural Future's ideals will strive to support the process and the need to unburden, cleanse and to build yourself faster than the world can take you apart. Essentially, we will be encouraging people to make thoughtful and intelligent choices that climb over man-made hurdles such as choosing organic foods, clean water, clean air, eco-friendly housing, renewable energy and living harmoniously with oneself and one's community. We envision that such individuals will in turn help others realize the same; in effect, changing the forest by influencing the trees.

We will ultimately create a world where living naturally and holistically are commonplace. A world where you can join us in our love for A Natural Future.
